- Specifically designed to enhance your existing curriculum**
- One Hour in Length.**
- Taught by experienced Chess Instructors.**
- Teaches Fundamentals of Chess while enforcing other topics.**
- All inclusive and Hassle Free!**
- Satisfaction Guaranteed!**

**Is Your Chess Game Up to Standards?  
Our Workshops Meet  
CCSD Core Curriculum and Power Standards!**

-  **Chess & History, "A Timeless Game"** - An overview of chess history, infused with a comprehensive chess lesson. As the students learn to play chess, they will also follow a timeline dating back 2000 years that encompasses Europe, America, and the Far East.
-  **Chess & Math, "It all Adds Up"** - Chess, at its core, is a numbers game. Position is determined by a material advantage. Each piece has a number value that chess players across the globe agree upon. Every exchange in chess is a math problem where the higher total wins. As children learn to play, their math will be challenged as they try to figure out the best positions and exchanges.
-  **Chess & Foreign Languages, "It's all CHECK to me"** - This workshop will guide children through a basic overview of chess but will also include discussion of the names of different pieces and moves in foreign languages including French, Japanese, Chinese, and Hindi.
-  **Chess & Art, "Paint a Pawn"** - Students will learn a basic overview of chess play and will also see how chess has appeared in poetry, music, art, and even continued to influence modern media.
-  **Chess & Logic, "It Figures"** - This workshop will use the basic chess skills taught to challenge the students to reason out classic chess problems using skills such as analytical thinking, pattern recognition, patience, concentration, memory, and critical thinking. Our instructors will walk the students through each problem using the same process Grand Masters have used through the ages.
-  **Chess Basics, "Chess Fun-damentals"** - A workshop specific to chess play. This workshop will teach the basics of chess. Every student will be able to play chess by the end of the lesson. As well, the lesson will delve further into game position, openings, end game strategies, and advanced winning techniques.

**Workshop Prices:**

**\$125.00 per workshop**  
(Minimum 2 workshops)

Or

**6 workshops for \$594.00**  
(\$99.00/workshop)
